EDUCATION

University of California, Berkeley | Berkeley, CA
B.A. Computer Science | Minor: Public Policy Aug 2019 – May 2023
GPA: 3.67/4.0
Awards: Regents' and Chancellors' Finalist (2019)
Relevant Coursework: CS 61B: Data Structures, CS 70: Discrete Math and Probability Theory, CS61C: Computer Architecture, Data 100: Principles and Techniques of Data Science, CS170: Algorithms, CS186: Databases, CS161: Security

EXPERIENCE

American Express | New York, NY
Software Engineer Intern June 2021 – Aug 2021
- Working to deliver full stack application, focused on developing new routing and API integration via Next.js and Node.js
- Building multiple backend functions as a service (FaaS) in Java to allow front-end interface with system of record (SOR)

Vote by Mail 2020 | San Francisco, CA
Software Engineer Intern May 2020 – Nov 2020
- Developed infrastructure via AWS EC2 & Redshift to create a centralized data store of nationwide public voter data. Leveraged Apache Airflow to develop data pipelines (DAGs) that automates ETL processes to streamline the data store
- Designed heuristic-based population clusters to run A/B tests and identified actionable insights to mobilize voter turnout
- Implemented insights to achieve a stat-sig CTR – successfully registered 40,000+ voters to vote-by-mail

Berkeley Consulting | Berkeley, CA
External Vice President May 2021 – Present
Project Manager Jan 2021 – May 2021
- Managed client relationship and led team of 4 consultants to map out donor profiles via primary research for large health NPO, generated competitor landscape, developed impact & sustainability analysis for new fundraising strategies.

Consultant Feb 2020 – Jan 2021
- Collaborated directly with c-suite at SoftBank-backed renewable energy company to model financial viability of hydrogen energy market entry in the United States
- Presented report guided by my research into current R&D, regulatory frameworks, and competitive landscape as well as projecting out relevant supply-chain scenarios and evaluating their market trend impacts

UAVs@Berkeley | Berkeley, CA
Software Developer Oct 2019 – Feb 2020
- Member of Team Aerobear – developing a drone for Association for Unmanned Vehicle Systems International competition
- Utilized OpenCV & SciKit-Learn to classify alphanumeric of various shapes, colors, orientations seen by the drone camera

PROJECTS

Hide My Face | [CODE] [APP WEBSITE] [MEDIUM] Jun 2020 – Present
- With recent, highly controversial uses of data, AI, and facial recognition technologies, developed an iOS app in Swift to provide users transparency into hidden metadata (e.g. location) stored in each image as well as the ability to blur faces
- Utilized Vision & UI Kit frameworks to automatically blur detected faces in static images. Designed sleek & intuitive UI to display image metadata through descriptive views & reverse geocoding location coordinates onto an interactive 3D map
- Learned to balance memory resources, deploy asynchronous tasks to background threads, and craft a streamlined UX

LEADERSHIP

Mission San Jose High School | Fremont, CA
Senior Class Officer, Treasurer Aug 2018 – Jun 2019
- Developed iOS app – scan student IDs to log purchases and allow admittance at school events via Swift and Firebase DB
- Raised $4000+ in sponsorships & managed class funds including deposits, expenditures, and requisitions of ~ $100,000
- Learned to analyze a service/business and create tools to maximize efficiency and organize resources to increase profits

MSJHS Computer Science Club | Fremont, CA
President, VP, PR Aug 2016 – Jun 2019
- Prepared students to compete in USACO and ACSL contests. Taught concepts: ASM, bit-string flicking, big-O notation, etc.
- Organized school-wide events e.g. cryptography challenge to introduce students, schoolwide, to CS in an exciting manner

SKILLS & INTERESTS

Languages & Environments: Java, Python, Swift, JavaScript, C, Airflow, Pandas, Xcode, SQL, Firebase, OpenCV
Interests: Student Pilot, Food & Aesthetics, Ethics, Sustainability
